Write a program to convert a given valid parenthesized infix arithmetic expression to postfix expression. The expression consists of single character operands and the binary operators + (plus), - (minus), * (multiply) and / (divide).

```
#include <stdio.h>
#include <conio.h>
#include <string.h>
int index = 0, pos = 0, top = -1, length;
char symbol, temp, infix[30], postfix[30], stack[30];
void infixToPostfix();
void push(char symbol);
char pop();
int precedence(char symb);
int main() {
  printf("Enter infix expression:\n");
  scanf("%s", infix);
  infixToPostfix();
  printf("\nInfix expression:\n%s", infix);
  printf("\nPostfix expression:\n%s", postfix);
  return 0;
}
void infixToPostfix() {
```

```
length = strlen(infix);
push('#');
while (index < length) {
  symbol = infix[index];
  switch (symbol) {
    case '(':
       push(symbol);
       break;
    case ')':
       temp = pop();
       while (temp != '(') {
          postfix[pos++] = temp;
          temp = pop();
       break;
    case '+':
    case '-':
    case '*':
    case '/':
    case '^':
       while (precedence(stack[top]) >= precedence(symbol)) {
          temp = pop();
          postfix[pos++] = temp;
       push(symbol);
       break;
```

```
default:
         postfix[pos++] = symbol;
    index++;
  while (top > 0) {
    temp = pop();
    postfix[pos++] = temp;
  }
  postfix[pos] = '\0';
}
void push(char symbol) {
  top = top + 1;
  stack[top] = symbol;
}
char pop() {
  char symb = stack[top];
  top--;
  return symb;
int precedence(char symbol) {
  int p;
  switch (symbol) {
    case '^':
```

```
p = 3;
       break;
     case '*':
     case '/':
       p = 2;
       break;
     case '+':
     case '-':
       p = 1;
       break;
     case '(':
       p = 0;
       break;
     case '#':
       p = -1;
       break;
  }
  return p;
Output:
 Enter infix expression:
 A^B*C-D+E/F(G+H)
 Infix expression:
 A^B*C-D+E/F(G+H)
 Postfix expression:
 AB^C*D-EFGH+/+
 Process returned 0 (0x0)
                               execution time : 20.600 s
  ress any key to continue.
```
